PROGRAMME DETAILS

PLENARY: Mobile Mental Health in 2022: Research Advances, Clinical Integration, & Marketplace Trends [Dr. John Torous, MD MBI](#)

Director, Digital Psychiatry Division, Beth Israel Deaconess Medical Center Harvard University

Successful solutions for mental health conditions – the leading cause of worldwide disability according to the WHO - will require large-scale deployment of digital health via asynchronous telepsychiatry to bridge the mental health access gap. This talk will focus on using smartphone digital phenotyping methods with the mindLAMP app towards capturing novel data and delivering scalable interventions. Core issues around ethics, trust, safety, and cultural considerations in the context of ongoing work in India will be shared. Examples of pathways to integrate smartphone apps into care will also be discussed in addition to methods for evaluating the potential of existing apps for global mental health use.

GLOBAL MENTAL HEALTH CAREER PANEL *Meet members of our Global Mental Health Program Advisory Group & learn about their diverse paths towards a career in the field*
